

Pr **ODAN-VALPROIC ACID**

CONTRACEPTION AND PREGNANCY PREVENTION

IMPORTANT INFORMATION TO KNOW

- Valproic acid* is an effective medicine for epilepsy.
- Valproic acid can seriously harm an unborn baby when taken during pregnancy.
- Use effective contraception at all times during your treatment with valproic acid.
- It is important to visit your specialist to review your treatment at least once each year.
- For additional information on the Valproate Pregnancy Prevention Program, contact your doctor.

**Keep this card safe so you
always know what to do.**

* Valproic acid is a form of valproate.

Pr **ODAN-VALPROIC ACID**

CONTRACEPTION AND PREGNANCY PREVENTION

IMPORTANT INFORMATION FOR ALL GIRLS AND WOMEN WHO COULD BECOME PREGNANT

What you must do:

- **Never stop taking valproate without discussing it with your doctor as your condition may become worse.**
- **If you are thinking about having a baby, do not stop using valproate or contraception before you talk to your doctor.**
- **If you think you are pregnant, do not stop using valproate. Make an urgent appointment with your doctor.**
- **To report a pregnancy while taking ODAN-VALPROIC ACID, call 1-888-666-6326.**
- **Ask your doctor to give you the Patient Guide for the Valproate Pregnancy Prevention Program**
